

PARTY / GROUP SWIM TESTS

Beginning June 1st, 2007 each child with a party or group will need to be skill checked by our lifeguarding staff prior to entering the pool. This skill check will identify children that are competent in water over their heads. Children who do not pass this deep water competency test will be required to remain in the shallow end during their party's pool time. To minimize the time this swim test takes, please provide the names and ages of all children attending your party in the space below. This list will be given to the lifeguard staff who will test your children before they are allowed to enter the water. Please have your party line up by the slide and the guard will meet you there. You may turn this form in to the front desk when you check in for your party. If you have any questions, don't hesitate to call your center specific coordinator.
